

A local physician group wanted a customized electronic healthcare record (EHR) solution. After spending significant time with the physicians to confirm documentation and patient workflow needs, Vinformatix created MedSonic, an award-winning Federally-certified EHR, which included:

MedSonic

- Full compliance with all HIPAA regulations and requirements
- Elimination of paper records
- Robust audit function to track changes to medical records
- Streamlined patient workflow adding value to the patient experience
- Automated checks for existing conditions, allergies, existing medications
- Seamless integration with diverse labs, pharmacies, patient education systems, and communication modules
- 6,000 patient encounters per day, securely documented
